RESEARCH SPECIALTIES / CAREER

SUMMARY STATEMENT

There have been three main strands to my research:

1. Research pertaining to case-finding for, and intervening in, risky lifestyle behaviours (tobacco and problematic alcohol, recreational drug use, gambling, abuse and lack of anger control, physical inactivity) mental health issues (anxiety and depression) in primary care.
2. International perspectives on primary care research and research capacity-building, especially in low- and middle-income countries.
3. Immunisation research.

My current approach is grounded in the principles of co-design and participatory action research.
